

Position

Biological Scientist / Biodefense Program Analyst
(Not a Laboratory Research Position)
BAI, Inc.

Work Location

Washington, D.C.

Description

The successful applicant will provide expertise and consultation to support the management and oversight of U.S. government-funded biological research and development (R&D) programs.

The individual will conduct reviews of those programs to identify potential biosafety and biosecurity issues, and will provide guidance and recommendations to promote best practices for agency-sponsored biological R&D activities. The individual will advise management and research staff on compliance challenges at relevant U.S. government and contractor facilities, and will support the implementation of an agency-wide biological research compliance infrastructure.

Requirements

Applicants must have substantive academic and professional backgrounds in the biological sciences, with minimum requirements of a Masters degree in the life sciences and at least 2 years of laboratory research or management experience. Strong written and oral communication skills are also essential for success in this position.

Competitive Qualifications

Special consideration will be given to applicants with doctoral degrees and/or biosafety professional credentials. Experience conducting research or managing laboratory operations in biocontainment facilities is preferred. Familiarity with Federal biodefense R&D programs is also a plus.

Security Clearance

Applicants must be eligible to obtain and maintain a U.S. government security clearance.

To Apply
